Dear Docket Management Branch (HFA-305):

RE: Docket No. 98N-1265

To who it may concern:

I am deeply concerned about a change in the law that would make me unable to get a particular medication that I require. I believe that as an intelligent person I have the right and the responsibility to make my own health care decisions. I have hired my physician to give me her expert advice in the area of my health care and I want to be able to have choices in the kind of medication I receive when I require it.

In the past 10 years I have required alternative prescriptions for health issues. Once was with chronic fatigue where large mega-doses of vitamins were required. The second time is on going. I went into early menopause. At the age of 35 I required Estrogen replacement therapy. Without it my risk of osteoporosis and heart disease are increased alarmingly. I cannot take traditional ERT. The product I use is compounded for me from plant derived estrogen. It is the only product that we know of that does not make me serially ill.

The studies have shown that it is much safer then the ERT being put out by the large drug companies. Do not take away my right to educate myself and make my own choice, There will always be the traditional drugs available to those who don't want to be bothered with thinking. I and many others like me resent being treated like children and having our rights taken from us.

Please do not take away our health care freedom.

In its present form, the MOU, as well as the Compounding Section 503A of the Modernization Act, severely restricts the rights of physicians and patients to obtain healthcare products from the provider of their choice, and infringes on my rights of compounding pharmacists to serve the public's medical needs.

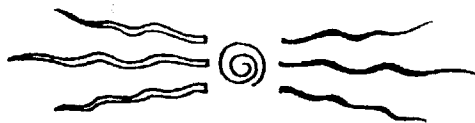

Thank you for time and consideration

Sincerely,

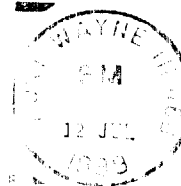

Victoria Wilson BS, CCE,

98N-1265
